Ground transport of computer hardware: 1,000 Euro
40 tables: 1,500 Euro
40 chairs: 800 Euro
Painting and decorating materials: 200 Euro
Cables and installation of cables: 1,000 Euro
Lighting: 1,000 Euro
Window protection, door and security locks: 500 Euro
Total requirements: 11,500 Euro

Next project phase:

Members of our organization will be traveling to Tanzania to take a look at the project status. Together with our partners, we will organize the transport of 40 computers and IT accessories to Dar es Salaam in North Tanzania. We will then establish a computer room in two schools in the Mara region (Tarime District) and the Pare region (Same District). Together with the teachers and students, we will create a pool using the 20 donated computers and providing them with the Linux4Africa terminal server solution. In cooperation with our project partners in Tanzania, we are planning to host an information meeting in Dar es Salaam for members of the government, headmasters and teachers. On the one hand, we will provide information about Open Source as an alternative to proprietary software, especially in the educational area, and on the other hand we would like to introduce our "Linux4Africa" project to a wider audience.
